

Notice of Failure to Submit a Disinfectant Level Quarterly Report (DLQOR)

The City of Alvarado Water System, PWS ID 1260001, has violated the monitoring and reporting requirements set by the Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30 TAC), Section 290, Subchapter F. Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfection residuals within the distribution system, monitor the disinfectant residual at various locations throughout the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis.

Results of regular monitoring are an indicator of whether or not your drinking water is safe from microbial contamination.

These violations occurred in the monitoring periods July 1- September 30, 2014.

We are taking the following actions to address this issue:

Training of multiple staff members has occurred to ensure timely reporting occurs in the future. A check system has been put in place to ensure timely submission of reports.

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions regarding this matter, you may contact Michael Dwiggin, Public Works Director at 817-879-1246.
